QUARTERLY RESULTS

	Q1	Q2	Q3	Q4	Average
2000	29,190	30,516	30,311	29,697	29,929
2001	29,304	29,518			29,412

In an indirect relationship with the non-sentenced ADP, the ADP of sentenced inmates had been decreasing since 1998. In the second quarter of 2001, however, the ADP of sentenced inmates increased by nearly 200 inmates. This increase may be correlated with the 13% decrease in early releases from a sentence from the first to the second quarter of 2001. Past data indicates that the fluctuation in this figure may indeed be related to the number of early releases.
